ABOUT US

AMJ Engineering and Fabrication is a locally owned Queensland company headquartered in Tingalpa, Brisbane. The company was formed in 2019 and has quickly established itself in the region as a supplier of choice due to the high performing culture of the team assembled.

AMJ Engineering and Fabrication can help you with all your Welding, Metal Fabrication and Construction needs – either in our fully equipped workshop or at your site. Our customers range from the individual consumer to large commercial and industrial businesses across a variety of different industries. No job is too big or small! We pride ourselves on delivering high quality, cost effective components and services to ensure our customers get real value for money.

Our services range from General Workshop Fabrication and Repairs to Onsite Repairs and Maintenance through to our Field service division. AMJ can also provide Project Management and installation of small to medium scale construction projects or large turnkey construction projects through our association with FPM Australia Pty ltd if required.

Engineering & Fabrication

FABRICATION

Whether you only need a few pieces of sheet metal cut or you have a large structure or highly specialised piece of plant to be manufactured and assembled, AMJ can handle your job!

We Offer

Concept Phase

We can assist at any stage of the lifecycle of your project. More often than not, getting us involved at the initial concept phase of your project can help deliver cost effective outcomes sooner.

Design and Engineering

If required, AMJ can coordinate design, engineering and shop detail for manufacture right through to final certification and compliance with Australia Standards. Alternatively, you may choose to supply your own design and shop detail to us.
The choice is yours.

Machining, Workshop Assembly and Painting

Once components are machined and / or fabricated and hold points are inspected, assembly can commence. On top of structural assembly, AMJ can provide mechanical expertise during assembly. AMJ can also coordinate any type of specified painting / galvanizing finish or pro-vide a recommendation.

MACHINING

From one-off components and repairs through to repeat production and specialised parts, AMJ provides machining solutions to support a wide range of industrial and construction applications.

We Offer

Precision Machining

Accurate machining of components to suit project requirements, whether manufacturing new parts or supporting existing equipment and assemblies.

Component Repairs & Modification

Machining services to repair, modify or restore existing components, helping extend service life and minimise unnecessary replacement.

Custom & One-Off Components

Custom machining for specialised components, replacement parts and one-off requirements where an off-the-shelf solution isn't available.

Working alongside our fabrication, mechanical and field service capabilities, our machining services allow AMJ to provide a more complete solution, from raw material through to finished component, assembly, repair or installation.

REPAIRS & MAINTENANCE

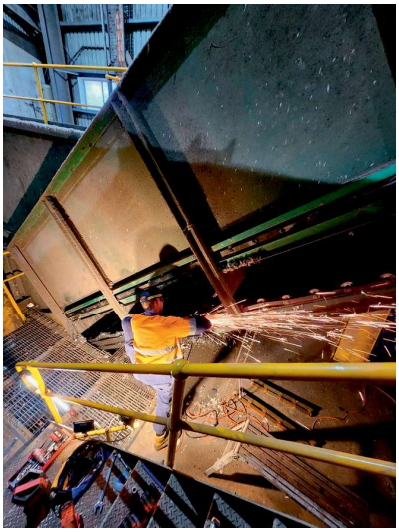

At AMJ, we recognise that downtime means loss of productivity and costs money. From a breakdown perspective, our field service division can get your plant and / or machinery up and running as quickly as possible 365 days per year. We can also provide routine preventative maintenance as directed or can work with you to create a new asset management schedule to assist in minimizing untimely breakdowns.

We Offer

Breakdown Service

Our field service division maintains a fleet of specialised trucks that can be dispatched for all welding (MIG, TIG, Stainless Steel and Aluminium) and mechanical repairs 24/7, 365 days per year.

Preventative Maintenance

Whether it's weekly, monthly or quarterly preventative maintenance frequencies or medium to full time contract placement, we can tailor make a cost effective program to suit your business.

Asset Management Scheduling
